

**Remove your
burden of
emergency
lighting
compliance
forever.**

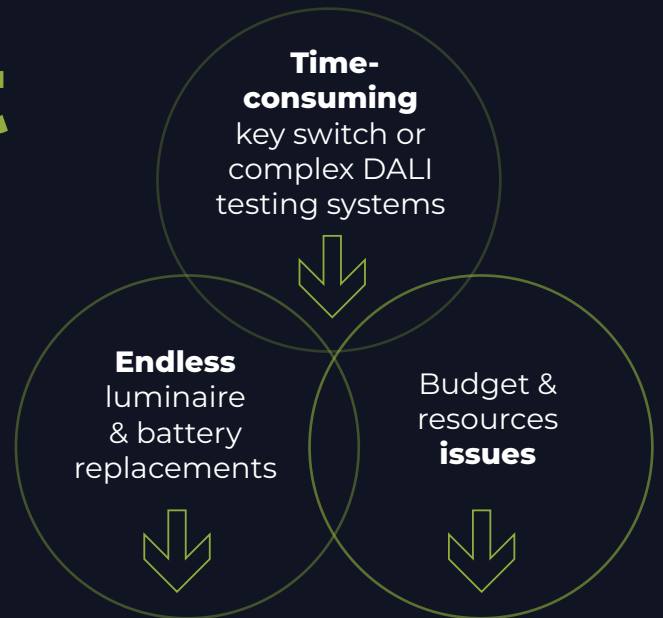

The Current State of Emergency Lighting

The market, through a cut-and-paste specification approach, gets delivered short-lifespan luminaires paired with complex, costly systems or manual key-switch testing.

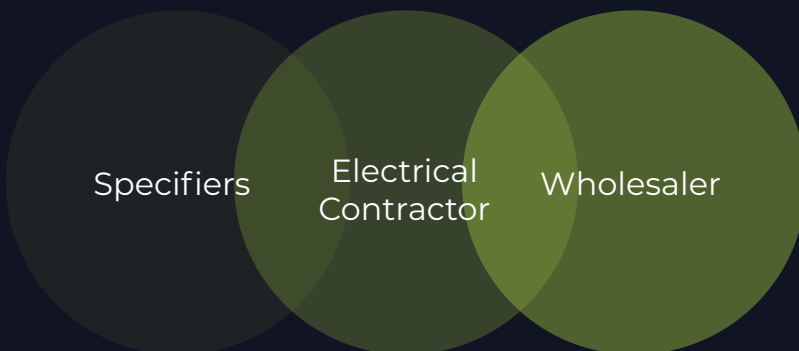

There's no ongoing support, so facility managers get stuck on a hamster wheel. You're constantly replacing fittings, wrestling with systems that don't work, and trying to figure out compliance with no clear guidance.

Our approach flips this on its head. We focus on what facility managers actually need, turning complexity into simplicity and lifting that compliance burden for good.

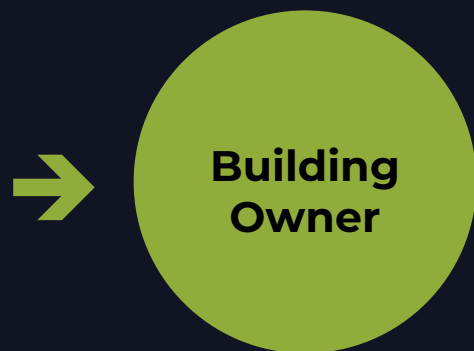

Difficult or **impossible** compliance and reporting

Markets' Focus

Cut and paste model

Our Focus

Removing your burden of compliance **forever**

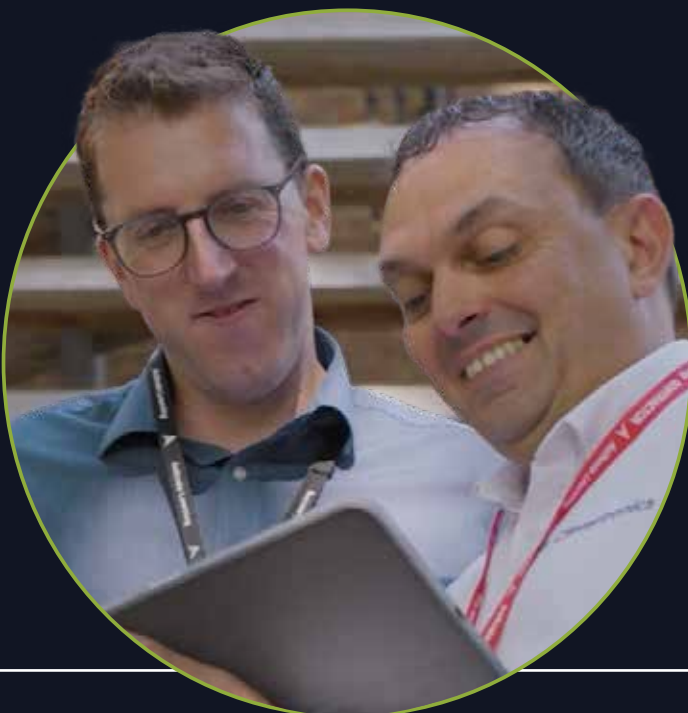

Ready to Simplify Your Emergency Lighting and Make Compliance Effortless **Forever** →

Old Way:

- **Ongoing** battery and fitting replacements every 3-4 years
- **Complicated** labour-intensive testing & reporting
- **Heavy resource** allocation creating burden
- **Poor compliance** outcomes and reporting
- **High support costs** from DALI integrators
- **Endless** budget approvals

Your NEW Way:

- **No battery or fitting replacements** for 12+ years
- **Fully automated** testing and reporting
- **Resources free** to focus on other tasks
- **Peace of mind** with a fully compliant operation
- **No integrator or software licensing fees**
- **No ongoing** maintenance budget

“

Clevertronics has been a **simple, reliable solution** that has **eliminated our compliance burden for good**. My team is now free from battery replacements and complex compliance reporting and can focus on other important tasks around the campus.”

**Effortless testing
and reporting**

L10 LITHIUM
NANOPHOSPHATE®
OPTIMUM
NOTHING ELSE COMPETES WITH NANOPHOSPHATE®

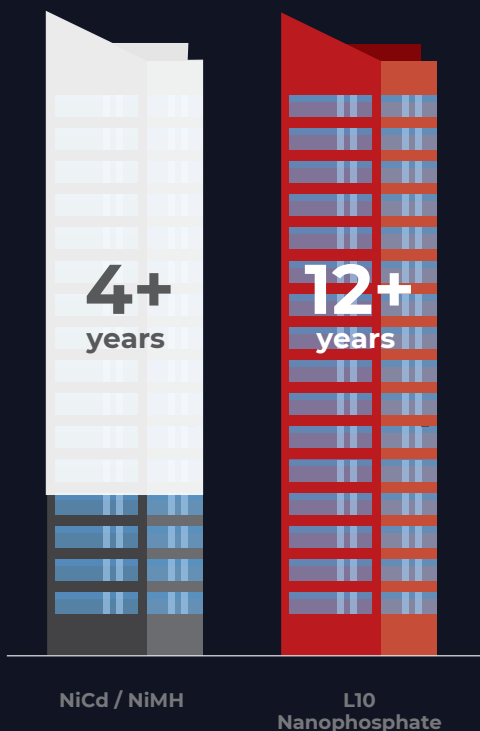

L10 Nanophosphate Features

- **12+ year** maintenance-free service life
- **10-year** warranty
- **89% reduction** in Carbon output
- **1 million+** installed luminaires
- **12 years** of on-site data
- **15 years** of long-term testing

Proven to Last 12+ Years

Not all Lithium battery chemistries perform the same. L10 Lithium Nanophosphate® emergency and exit luminaires have been proven in the field and laboratory since 2012.

Clevertronics is the pioneer and world leader in lithium-powered emergency lighting. Our 10-year warranty is built on the foundation of the longevity demonstrated through our long-term testing and the installation of over 1 million luminaires worldwide.

A proven way to **eliminate the compliance burden for good.**

This solution has already transformed emergency lighting for thousands of facilities worldwide.

Firstly, our **L10 emergency and exit luminaires** are built and tested to last for over 12 years, so you can say goodbye to constant replacements.

Then, our **Zoneworks HIVE system** handles all testing and compliance reporting for you, all managed by a single controller that can handle up to 1,000 luminaires with no extra hardware needed.

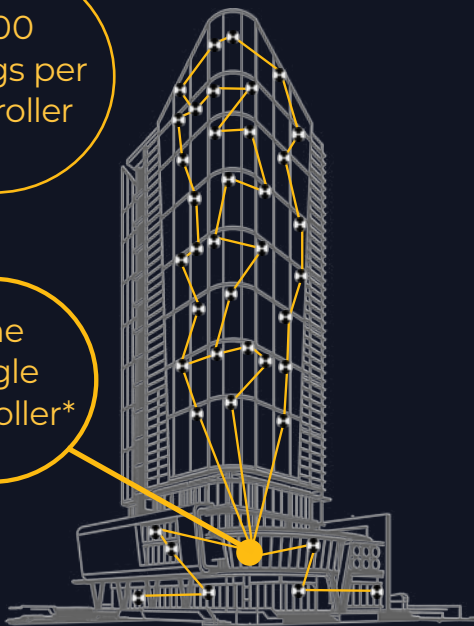

Finally, our complimentary **Lifetime Technical Support**. Whether it's training, advice, or software help, you can call us anytime to keep your system running smoothly.

Zoneworks HIVE Features

1000
Fittings per
Controller

One
Single
Controller*

*1000 fittings per controller, unlimited fittings per system.
Location of the controller is flexible & can be moved should the need arise.

- **Simple automatic testing** and reporting capabilities
- **Cloud-based dashboard** with all the data you need to see
- **Progressive upgrade options** to remove CAPEX approvals
- **Manage multiple sites** on one platform
- **Various hosting solutions** to suit each client
- **Lifetime support** free of charge

The effortless power of Zoneworks! Just one plug-and-play controller serves as the only backbone for your entire system.

Powered by Zoneworks HIVE's innovative Dynamic Self-Managed (DSM) Meshing, each fitting self-discovers to form a robust, interference-free network. This self-organising design maximises efficiency, slashes commissioning time, and streamlines ongoing management—ensuring faster, and ultra-reliable installation and operation for the life of the system.
